English: Advanced | Indonesian: Native/Proficient

Computer Science undergraduate at Universitas Padjadjaran with a GPA of 3.88 and a passion for frontend and full-stack web development. Experienced in designing and developing responsive, user-centric web applications using React, Next.js, Vue.js, Nuxt.js, Laravel, and CodeIgniter through academic, organizational, and personal projects. Strong understanding of modern web technologies, UI/UX implementation, and RESTful API integration, complemented by experience in data-driven applications and collaborative software development. A proactive learner with proven leadership, communication, and project coordination skills, eager to contribute to impactful products while continuously growing as a software engineer.

EDUCATION

Universitas Padjadjaran

Bachelor of Computer Science

Bandung, West Java

2023 – 2027

- Current GPA: 3.88
- Relevant Coursework: Web Programming, Data Structures, AI, Software Engineering, Databases, Project-based Development.

EXPERIENCES

Laboratory Teaching Assistant - Web Programming

Informatika Unpad | Hybrid & On-site

Aug 2025 – Dec 2025

- Supported the instruction of web programming courses for more than 40 students, covering both theoretical concepts and practical implementation.
- Served as a project mentor, assisting students in designing, developing, and debugging web-based applications throughout the course.
- Collaborated with lecturers and fellow assistants to create an engaging learning environment and improve students' understanding of full-stack web development.

Skills: Web Development, JavaScript, Laravel, CodeIgniter 4, Databases, MySQL

Informatics Festival 2025

Staff of IT Competition

Jun 2025 – Oct 2025

- Managed participant communications for technology competitions involving approximately 100 participants across 38 teams, ensuring the timely delivery of technical information, schedules, and event requirements.
- Coordinated with external vendors and competition partners to support the successful implementation of the Competitive Programming track, including platform readiness and competition logistics.
- Contributed to the planning and execution of the Hackathon event by supporting competition design, participant engagement, and on-site operations throughout the event lifecycle.

Skills: Stakeholder Communication, Event Management, Operations Coordination, Problem Solving, Teamwork

Himatif FMIPA Unpad

Staff of Social Department

Feb 2024 – Dec 2025

- Organized and participated in community service programs benefiting rural communities and social care institutions in the Bandung area through educational initiatives and charitable contributions.
- Coordinated with team members and organizational stakeholders to ensure the successful planning and implementation of social impact activities.

- Provided leadership and mentorship to junior members, fostering effective teamwork, communication, and operational efficiency across departmental programs.

Skills: Leadership, Community Service, Team Management, Stakeholder Coordination, Communication

PROJECTS

Way2Home - Budget-Controlled Construction Platform

Front-End Developer & UI/UX Designer | Laravel, Blade, PostgreSQL, Supabase, HTML, CSS, JavaScript

A digital construction platform that streamlines home building, renovation, and material procurement while providing personalized housing recommendations based on a rule-based decision system.

- Designed and developed responsive, user-friendly interfaces across the platform, translating UI/UX designs into reusable and maintainable frontend components.
- Integrated frontend features with backend services, including authentication, Supabase-powered data management, and a rule-based recommendation system that delivers personalized housing suggestions based on user preferences and housing datasets.
- Collaborated in an Agile development environment using Jira to manage tasks, track project progress, and coordinate feature implementation with cross-functional team members, contributing to on-time project delivery.

NusaGraph – Geospatial Semantic Web Application

Front-End Developer & UI/UX Designer | React, TypeScript, JavaScript, Tailwind CSS, SPARQL, Apache Jena Fuseki

A semantic web application that maps and analyzes Indonesia's geospatial data by integrating RDF knowledge graphs with interactive web visualizations.

- Designed intuitive UI/UX wireframes and developed a fully responsive, type-safe web interface using React, TypeScript, and Tailwind CSS to ensure seamless cross-device accessibility.
- Integrated front-end components with an Apache Jena Fuseki triple store via dynamic SPARQL query execution over HTTP APIs, mapping complex SPARQL JSON responses to structured TypeScript interfaces.
- Implemented interactive map visualizations and semantic search functionality, enabling users to explore hierarchical administrative regions and geographical feature relationships effortlessly.

Rodaza Coffee - Coffee Shop Order Management

Front-End Developer & UI/UX Designer | CodeIgniter 4, MySQL, HTML, CSS, JavaScript

A full-stack web application developed to support café operations, enabling efficient order management, customer transactions, and administrative monitoring.

- Designed and developed responsive interfaces for customer and administrator portals, focusing on usability, accessibility, and consistent user experience.
- Implemented front-end components and application workflows using CodeIgniter 4 to support ordering, table management, delivery requests, and transaction processing.
- Contributed to system architecture and feature implementation, supporting business operations through integrated order tracking and revenue reporting functionalities.
