

ROBBY AZWAN SAPUTRA

Jakarta, Indonesia | oby.azwan@gmail.com | linkedin.com/in/robbyazwan

English: Professional Working Proficiency | Indonesian: Native

Computer Science undergraduate at Universitas Padjadjaran with a GPA of 3.86 and a strong foundation in full-stack web development, data analytics, and machine learning. Experienced in developing technology solutions through academic, organizational, and project-based activities, with a proven ability to collaborate effectively in multidisciplinary teams. Recognized for strong leadership, project coordination, and time management skills, enabling the successful delivery of objectives in dynamic environments.

EDUCATION

Universitas Padjadjaran

Bandung, West Java

Bachelor of Computer Science

2023 – 2027

- Current GPA: 3.88
- Relevant Coursework: Web Programming, Data Structures, AI, Software Engineering, Databases, Project-based Development.

EXPERIENCES

Laboratory Teaching Assistant - Web Programming

Aug 2025 – Dec 2025

Informatika Unpad | Hybrid & On-site

- Supported the instruction of web programming courses for more than 40 students, covering both theoretical concepts and practical implementation.
- Served as a project mentor, assisting students in designing, developing, and debugging web-based applications throughout the course.
- Collaborated with lecturers and fellow assistants to create an engaging learning environment and improve students' understanding of full-stack web development.

Skills: Web Development, JavaScript, Laravel, CodeIgniter 4, Databases, MySQL

Informatics Festival 2025

Jun 2025 – Oct 2025

Staff of IT Competition

- Managed participant communications for technology competitions involving approximately 100 participants across 38 teams, ensuring the timely delivery of technical information, schedules, and event requirements.
- Coordinated with external vendors and competition partners to support the successful implementation of the Competitive Programming track, including platform readiness and competition logistics.
- Contributed to the planning and execution of the Hackathon event by supporting competition design, participant engagement, and on-site operations throughout the event lifecycle.

Skills: Stakeholder Communication, Event Management, Operations Coordination, Problem Solving, Teamwork

Himatif FMIPA Unpad

Feb 2024 – Dec 2025

Staff of Social Department

- Organized and participated in community service programs benefiting rural communities and social care institutions in the Bandung area through educational initiatives and charitable contributions.
- Coordinated with team members and organizational stakeholders to ensure the successful planning and implementation of social impact activities.
- Provided leadership and mentorship to junior members, fostering effective teamwork, communication, and operational efficiency across departmental programs.

Skills: Leadership, Community Service, Team Management, Stakeholder Coordination, Communication

PROJECTS

Way2Home - Budget-Controlled Construction Platform

Frontend Developer, UI/UX Designer | Laravel, Blade, PostgreSQL, HTML, CSS, JavaScript

A housing-focused web platform designed to provide users with a seamless and intuitive experience in accessing housing-related services.

- Contributed to project planning and requirement analysis by defining user flows, application features, and overall website structure.
- Designed and developed the complete user interface across all major pages, ensuring a responsive, consistent, and user-friendly experience throughout the platform.
- Assisted in implementing authentication features and collaborated with team members to coordinate development activities and ensure timely project delivery.

COREN – Customer Segmentation and Analytics Platform

Full-Stack Developer | Python, HTML, CSS, JavaScript, RFM Analysis, K-Means Clustering

A data-driven web application that leverages RFM analysis and K-Means clustering to identify customer segments and generate actionable business insights through real-time analytics dashboards.

- Engineered an end-to-end customer segmentation pipeline, transforming raw transactional data into meaningful customer groups using RFM metrics and unsupervised machine learning techniques.
- Developed backend data processing modules in Python to perform preprocessing, clustering, and automated segmentation analysis.
- Built interactive KPI dashboards and data visualizations that enable stakeholders to monitor customer behavior patterns and support strategic business decisions.

Rodaza Coffee - Coffee Shop Order Management

Frontend Developer, UI/UX Designer | CodeIgniter 4, MySQL, HTML, CSS, JavaScript

A full-stack web application developed to support café operations, enabling efficient order management, customer transactions, and administrative monitoring.

- Designed and developed responsive interfaces for customer and administrator portals, focusing on usability, accessibility, and consistent user experience.
- Implemented front-end components and application workflows using CodeIgniter 4 to support ordering, table management, delivery requests, and transaction processing.
- Contributed to system architecture and feature implementation, supporting business operations through integrated order tracking and revenue reporting functionalities.

Additional projects are available in my portfolio (robbyazwan.vercel.app) and GitHub (github.com/Robaz04), including work in machine learning, IoT, game development, data analytics, and augmented reality.

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript, SQL, C#, C++

Web Development: React, Next.js, Vue.js, Nuxt.js, Laravel, CodeIgniter 4, HTML, CSS, Tailwind CSS, REST API

Data & AI: Machine Learning, TensorFlow, Scikit-learn, Pandas, NumPy, Data Analytics, K-Means Clustering, Data Warehouse, ETL

Tools: MySQL, PostgreSQL, Git, GitHub, Docker, Linux, Power BI, Grafana, Apache Superset, Jupyter Notebook, Unity
